http://www.inspt.utn.edu.ar/

EXPERIENCE

Buenos Aires City Government
Jr. Programmer
JAN 2021 - PRESENT.
Doing backend and database tasks.

CODERHOUSE
React tutor
FEB 2021 - PRESENT.
Teacher's assistant at the React course.

PROJECTS

Personal Portfolio 2020

https://dipietronicolas.herokuapp.com/

Webpage made with NodeJs and Express (server-side)
Bootstrap 4 and jQuery on the Front end.

Tecno-tienda 2021

https://tienda-online-855ba.firebaseapp.com/

This is an ecommerce I made for my final project at
coderhouse, I'm really proud of it. I made it with ReactJs
and pure CSS on the frontend, and it uses firebase as a
backend and database administrator.

Fantastic Chat 2021

https://fantastic-chat.herokuapp.com/

It's a chatroom, made with Nodejs and Expressjs. It uses
socket.io to comunicate the server with multiple clients.
The frontend was made with ReactJs, functional
components with hooks and ContextAPI.
